

Worksheet for
Makeup/Extra Credit

What Job do you want?

What do you need to
know?

How important is Algebra in the real world? What kind of a job do you want when you leave High School? Does it involve programming?

Goal: I will look at two different job openings in the link below from Glassdoor.com and learn what it is needed to work in the Information Technology (IT) Industry.

Activity:

Go to following link and look at two different job openings. Research and answer the questions below from current job openings in IT job market choosing one of the jobs.

If a popup comes up click the "X" to close the popup out and DO NOT give any information or sign up for email alerts. This is only for research.

Answer the five questions below in a two or three short paragraphs written following the WJMS writing rubric in a maximum of 500 words. You may turn in a typed copy or share document with Mr. Williams.

1. What company and position have you selected?
2. What are the qualifications needed for the position, feel free to use the Internet or ask any teacher, Math, Science, Mr. Williams, what those qualifications are asking for.
3. Is programming or coding involved?
4. What do you think you would like to do if you were to work in the IT Industry?
5. Is programming and coding important?
